

THE IADL STUDY

Volunteers Needed for Research Study about Memory and Brain Changes in Older Adults!

Researchers from Massachusetts General Hospital are conducting a research study to determine if phone/computer-based tests can help doctors make an early diagnosis of Alzheimer's Disease.

You may be eligible to participate if you:

- Are between the ages of 55 and 90.
- Have mild memory problems.

This research study involves:

- 8 visits to Massachusetts General Hospital over 3 years.
- Evaluations of your memory and brain scans.

You will receive up to \$750 for the completion of the study.
For more information, call Chris Gonzalez at 617-726-7619.

All information is kept completely confidential.
