

# Need little reminders more often?

If you're at least 50 years of age and have noticeable changes in your memory, judgement or ability to perform your daily activities, you may qualify for a medical research study. This study will evaluate an investigational drug for memory and thinking. A local study doctor is enrolling participants now.

If you qualify, you'll receive:

- Study-related diagnostic procedures that may provide insight into your thinking and memory issues
- Continuous medical monitoring of your condition
- Possible reimbursement for travel
