

Let's Talk Research Participation

What's it like being a human research subject?

Are any of the procedures painful?

How often do you go to the research clinic?

Join us and get answers to all the questions you have about research but were afraid to ask! Staff will give a brief overview of research studies and a current research study participant will take questions. This session will be held virtually.

Wednesday, May 18th @ 7:00 PM
