

IT TAKES AN ENTIRE TEAM TO MAKE A DIFFERENCE.

IT STARTS WITH YOU!

UNDERSTANDING THE PROCESS TO ENROLL IN RESEARCH STUDIES

FILL OUT AN INTEREST FORM!

We will do our best to call or e-mail in the next 2 weeks.

EXPECT A CALL OR AN E-MAIL

Someone from our team will reach out to you and explain our program in further detail.

This is a great time to ask any questions you may have! If you are still interested in the program, a telephone screen will be conducted or scheduled at a time that is convenient for you.

COMPLETE A TELEPHONE SCREEN

During the telephone screen, we will gather information about your physical and cognitive health.

We will ask you about your medical history including which medications, vitamins, and supplements you are taking. This information helps us narrow down which study is right for you. The telephone screen can take up to 45 minutes.

MEDICAL RECORD RELEASE FORM - YOUR SAFETY IS OUR PRIORITY.

We will ask you to sign a medical record release form, so that our physician can review your medical records, assess which studies are safe for you and find the best study match.

Certain medical diagnoses or past health events may not be appropriate to include in our studies. Our study physicians will review your medical records to ensure you meet the inclusion criteria for our studies.

YOUR HOME FOR RESEARCH!

The recruitment specialist will let you know via a phone call or email (depending on your preference) which study is the best fit for you.

If you agree to participate in the study identified, we will provide your information to the study specific coordinator to have them schedule an in-clinic screening visit. Take this opportunity to ask any other questions you have!

If we do not find a study for you, don't worry! As long as you are interested in participating in research, we will keep your information to be considered for future studies that may be a good fit!

FINAL STEP: IN-CLINIC SCREENING VISIT

During the in-clinic screening visit, the study team will further explain the study in further detail, and **you should ask any and all questions you have**. You will be asked to sign the study-specific informed consent, and complete a series of procedures that will result in your screening status.

Eligible: You met the inclusion criteria for this study and will continue your participation.

Ineligible: For one reason or another, inclusion criteria was not met. We will try our best to find another study you may be eligible for, as long as you agree to us reaching back out to you!
